Prepaid College Savings Plans Might Not Cover All Costs

By SEAN D. HAMILL
47 minutes ago

The stock market slump and rising college costs have combined to drive all but two of the nation’s 16 such funds into the red.

New Court Term Hints at Views on Regulating Business

By ADAM LIPTAK 34 minutes ago

The Supreme Court term that begins Monday will be dominated by cases concerning corporations, compensation and the financial markets.

Corzine’s Wall Street Résumé Losing Value

By DAVID KOCIENIEWSKI 36 minutes ago

The Wall Street pedigree of Gov. Jon S. Corzine, seen at right with Henry M. Paulson when they were both at Goldman Sachs, has lost its appeal to New Jersey voters.

OPINION

No Leadership on Jobs

Without more federal stimulus spending to spur job creation, the job market, which is already bleak, could get bleaker.

The Global Resources Forum
Collecting for African Studies has advanced considerably since the development of the scholarly field in the 1950s. Many established vendors now supply books, serials, and newspapers published in Africa (or relating to Africa from other countries). The African Books Collective (ABC) represents more than 120 independent African publishers from 21 countries, distributing African-published works to North America and worldwide. The Library of Congress field offices based in Nairobi and Cairo cover more than 35 African countries through its cooperative acquisition programs.

Cooperation among African librarians in North America remains the rule rather than the exception. The African Librarians Council (ALC) (est. 1938) fosters communication and information sharing among libraries and individuals. The Cooperative Africana Microform Project (CAMP) (1963) promotes collaborative approaches to collection preservation, and access to rare, expensive, or fragile primary and secondary source material from Africa.

Technical infrastructure and capacity in Africa continue to improve over time, but the majority of publications from Africa remain “offline.” Digitization projects in North America, Europe, and Africa are emerging to provide access to books, serials, dissertations, multimedia, and archival collections. Challenges to efficient collection of materials from Africa remain daunting. International collaboration and partnerships with institutions in Africa are key for improving access to resources and ensuring sustainability.

Current research trends in Africa reflect the changing nature of international and Area Studies. In addition to the historically strong focus on anthropology, economics, history, and political science, new scholarly works in the fields of agriculture, education, environmentalism, health and medicine, law, conflict and human rights, and the natural sciences.
Documenting Revolution in the Middle East

Roberta L. Douglas
Middle Eastern Studies Librarian
University of Texas at Austin

This photograph of a Tahrir protest was taken on September 9, 2011, and posted in
Mustafa Arif’s photographs on Flickr. Courtesy of Flickr.

What does it mean to document a revolution? The recent massive uprisings in
Arab countries created a plethora of artifacts: printed documents of various
kinds used by protesters to organize their efforts and codify their ideals, demands,
and goals; photographs and video recordings of protesters in the streets, news broad-
casts, television shows by influential leaders; posters and signs used to motivate
the efforts of both revolutionary and counter-revolutionary; creative responses
in the form of art, music, multimedia performances; and websites and social media
tools for organizing, motivating, and documentation.

Documentation of the so-called “Arab Spring” involves collecting a number of for-
mats: some born-digital, some analog, and all almost entirely ephemeral, fleeting,
and endangered.

Some significant projects have emerged that attempt to document the revolutionary
movements that began in December 2010, particularly Egypt’s Tahrir Square:

The Committee to Document the 25th January Revolution

This volunteer group consists of historians, political scientists, anthropologists,
and technology experts collecting everything we know, including oral testi-
mories, blogs, newspaper clippings, even Facebook status messages and tweets
in order to make this a wide library resource for anyone studying the events.

The group organized on January 14, 2011, the date of Tunisian president Ben Ali’s
resignation.

Khaled Faizy, one of the country’s leading historians, was asked by the head of
Egypt’s archives to oversee the project to document the country’s political and social
upheaval, “to gather as much primary data on the revolution as possible and
deposit it in the archives so that Egyptians now and in the future can construct
t heir own narratives about this pivotal period.” As Faizy described to The
Guardian: “Documenting the revolution sounded like an easy thing, but what is
the revolution? When did it start? When did it end? Who was involved? What con-
teptuates participation in the revolution—is it only those who went down to Tahrir, or is it also
the doctors who worked extra-long hours in their hospitals to treat the wounded?
What about a police officer who fought the protesters—is he a part of the revolu-
tion or not?”

R-Shair—R-Shair is a data-mining project that draws content from Twitter
and various websites and blog posts. It attempts not only to document the Arab
Spring, but also provides tools for visual analysis of the data. It is “Tweetmeme”
tool (one of the very few places that provided public access to tweets posted.
Nineteenth Century Collections Online (NCCO)

ABSTRACT
Gale Cengage anticipates that Nineteenth Century Collections Online (NCCO) will be an extensive database with multiple content types, covering most regions of the world, developed in a rolling release over several years. The release of the first four collection modules is scheduled for spring 2012.

This review is in progress. CRL is working to gather more information and critical assessment. We encourage our community to submit comments on their experiences with the database.

SOURCES
Sources for this review include information publicly posted or obtained directly from the publisher, data collected by CRL staff and members, and examination of the digital collection when possible. Other sources are noted where cited.

Title History
The Times of India was founded on November 3, 1838. It became a daily edition in 1850, and is the highest circulating English-language paper in India. The Times of India is published simultaneously in multiple editions (Mumbai, Delhi, Calcutta, and Ahmedabad among them), with some content differences in each.

The Times of India is published by Bennett, Coleman & Co. Ltd. as part of The Times Group. The Times Group publishes the business daily The Economic Times, the tabloid-style newspaper Mirror in several cities, and has other newspapers in Hindi & Marathi. The Times Group also owns Radio Mirchi, an FM Radio network and a business TV channel ET NOW and English-language news channel TIMES NOW. The group's Times Internet Limited offers email, social networking and a host of other services & sites. It is also significant in book publishing, music publishing, outdoor media and event management.

Source of the digitized content
ProQuest reports the digital content was entirely derived from the microfilm produced by The Times of India publisher Bennett Coleman & Co., Ltd. For a description of the various microfilm efforts and
Global Water: 2010 and Beyond
A Global Resources Round Table

Day One: Presentations 3
Day Two: Working Sessions 12

In This Issue

Global Water is a report on a roundtable held in October 2010 by CRL and the Greater Western Library Alliance, on the subject of data and documentation on the supply, quality, and use of water in the Western United States and the developing world. The roundtable was the latest forum in a series sponsored by the CRL Global Resources program. At these gatherings, researchers, librarians, archivists, and publishers examine major fields of study (such as human rights, news publishing, international studies) emerging types of research being done in those fields; and new types of evidence and documentation that support such research.

Presenters at Global Water surveyed the range of types of water-related information, from real-time data on stream levels collected by the U.S. Geological Survey, to the Western Water Digital Library and other online collections of historical documentation, to proprietary models of water distribution systems created by private consulting firms like DHI Solutions.
